**7. Financial instruments- Fair Value Measurement**

The Fund measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements in accordance with SLFRS 13.

**Level - 1**

Financial instruments that are measured in whole or in part by reference to published quotes in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange and those prices represent actual and regularly occurring market transactions on an arm's length basis.

**Level - 2**

Financial instruments that are measured at fair value on a recurring basis. As market quotes generally are not readily available or accessible for these securities, their fair value measures are determined using relevant information generated by market transactions involving comparable securities.

**Level - 3**

Financial Instruments that are not supported by observable market prices information.

Due to the nature of the short term maturity, carrying value of the financial asset at amortised cost are approximated to their fair value.

**7.1 Fair values versus the Carrying amounts**

The fair values of financial assets and liabilities, together with the carrying amounts shown in the Statement of Financial Position are as follows;
